## AEROPLANE WEAPONS OF TRENCH WARFARE

were taken by an officer of the French flying corps anti-aircraft guns. They are for the use of maps for the Allied generals in the field.

TEN MILES INSIDE THE GERMAN LINES—A village in the Verdun sector, cut by the rear trench lines of the army of the German Crown Prince and mottled by shell holes. Each circle in the network of trenches incloses a battery of German artillery, each rectangle a section fortified with big guns.

CROW'S WOOD IN THE VERDUN ASSAULT. The photograph was taken in the latter phase of the German attacks on the city. The whirls and squared effects in the lines of trenches stand out more distinctly because the aeroplane was within half a mile of the earth.
